Claims

- 1. Clothing used in the treatment and reduction of the pains characterized with a band (2), one or more conductive wire (3) which can be fixed onto a band and two or more magnets (5) fixed onto the said band (2).
- 2. Clothing as defined in Claim 1 characterized with a band (2) on the waist part.
- 3. Clothing as defined in any of the Claims above characterized with an elastic band (2).

- 4. Clothing as defined in any of the Claims above characterized with a wire (3) having the thickness of a thread.
 - 5. Clothing as defined in any of the Claims above characterized with a wire (3) having the width of a strip.
 - 6. Clothing as defined in any of the Claims above characterized with a wire (3) which is weaved with another thread in the band.
 - 7. Clothing as defined in Claim 6 characterized with a band made of a thread having a thickness more than the wire.
 - 8. Clothing as defined in Claims 1-5 characterized with a wire (3) which is adhered on the band.
 - 9. Clothing as defined in any of the Claims above characterized with a band comprising a wire (3) extending along the entire length.
 - 10. Clothing as defined in Claims 1-8 characterized with a band comprising a wire extending to an extent.
 - 11. Clothing as defined in any of the Claims above characterized with a wire covered by an insulation material.
 - 12. Clothing as defined in any of the Claims above characterized with a band having an open end.
 - 13. Clothing as defined in any of the Claims above

characterized with a wire made of a ductile metal having a high coefficiency.

- 14. Clothing as defined in any of the Claims above characterized with a wire attached to the band in a zigzag way.
- 15. Clothing as defined in any of the Claims above characterized with a wire attached to the band in a wavy way.
- 16. Clothing as defined in Claims 1-15 characterized with wires having serial connections.
- 17. Clothing as defined in any of the Claims above characterized with wires having parallel connections.

30

- 18. Clothing as defined in any of the Claims above comprising two or more pockets (4) for the placement of the magnets (5).
- 19. Clothing as defined in Claim 18 characterized with a pocket formed by being folded and sewed from the ends of the band.
- 20. Clothing as defined in Claim 18 characterized with a pocket formed by the addition of another fabric on the band.
- 21. Clothing as defined in any of the Claims above characterized with a magnet having 0.5-13000 Gauss.
- 22. Clothing as defined in any of the Claims above characterized with a magnet having a thickness of 0.05-10 mm.
- 23. Clothing as defined in any of the Claims above characterized with a magnet in a metal nucleus form induced by an electric source.
- 24. Clothing as defined in any of the Claims above characterized with the magnets having the same poles (polarizations).
- 25. Clothing as defined in Claims 1-23 characterized with the magnets having different poles (polarizations).

- 26. Clothing as defined in any of the Claims above characterized with a band having a distance of 0.5-50 mm between its open ends.
- 27. Clothing as defined in Claim 26 characterized with a band comprising a holder (6) for holding the open ends together.

10

15

- 28. Clothing as defined in Claims 26 and 27 characterized with a holder made of plastic material.
- 29. Clothing as defined in Claims 26 and 28 characterized with a band comprising a holder in a belt form whose width can be adjusted.
- 30. Clothing as defined in any of the Claims above having a form of underpants and being made of a disposable material.
- 31. Clothing as defined in Claim 30 being made of a cellulose and/or plastic base material.
- 32. Clothing as defined in Claims 31 and 32 comprising a hygienic pad on its crotch part.
